Power & Energy Team Experts

The emerging alternative power and energy sectors have been rapidly changing with constant pioneering and refinement in energy collection, storage, and distribution. As the world starts moving away from the fossil fuel consumption model, alternative and renewable energy development is reaching a crescendo with extensive development taking place to make this type of energy more accessible and efficient in delivery.

The following is a general overview of available services provided by the SLG Power & Energy Team:

- Environmental Risk Assessment
- Upstream and offshore Energy
- Regulatory Issues Relating to Emerging Markets.
- Platforms and Mount Risk and Loss Assessment
- Exposure to Private and Commercial Sectors
- General Operation Failures
- Liability and Litigation Claims and Assessment
- Structural Failure and General Damage Assessment.

The alternative power and energy sector brings a new market to the forefront of the risk and underwriting sectors.

The SLG Power & Energy Team of experts adapt with the industry and provide exceptional specialized claims handling and surveying expertise.
